Description

DESCRIPTION : When transferring a mobile product from the source branch to the destination branch, the product quantity is transferred successfully, but the associated mobile serial numbers are not transferred. As a result, the transferred mobile product cannot be sold from the destination branch because its serial number is unavailable.

STEPS TO REPRODUCE :
1. Navigate to inventories , select the product (Mobile with serial)
2. Click the Transfer and select destination branch , enter the transfer quantity with serial.
3. Click the Transfer.
4. Navigate to the destination branch and check the transferred product's but Serial number is not Transferred.

Expected Result:
The product quantity and its associated mobile serial number(s) should be transferred successfully from the source to the destination warehouse/branch. The transferred serial number should be available for selection when creating a sales invoice at the destination.

Actual Result:
The product quantity is transferred successfully, but the associated mobile serial number is not

transferred to the destination. Consequently, the product cannot be sold from the destination warehouse/branch.
